Montpelier
Feedzone
Simplex
146.54

Teams with multiple Support Crew vehicles should consider dividing up feed zone support; to reduce traffic congestion and stress. For example, one support team could cover feed zones 1 and 6 with the other team covering feed zones 3 and 5. Both teams could drive on roads that are less traveled.

Vehicles driving directly to Montpelier via Logan Canyon, should leave Logan no later than 7:30 a.m. to ensure there's no crossover with cyclists arriving at the junction of SR-36 and US-89.
